- Arriving at fair value of shares of the Company.

### VI. Approach and Methodology considered in our Value Analysis:

#### **General Principle for Valuation**

There is no single definition of the term 'Value' that is suitable for all purposes or at all times. The value of a particular asset may vary according to different valuation methodologies that are adopted to ascertain the value for a specific purpose. Valuation of securities is an inexact science. It may sometimes involve a set of judgments and assumptions that may be subject to certain uncertainties.

#### **Bases of Value**

The Report has been prepared on the basis of "Fair Value" as on Valuation Date. IFRS 13/ IND AS 113 defines the Fair Value as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date.

#### **Premise of Value**

Our Report has adopted "Going Concern Value" as premise of value in the current valuation exercise. The generally accepted definition of Going Concern value is the value of the business/company that is expected to continue to operate in the future.

We have carried out the valuation exercise in accordance with the principles laid down in the International Valuation Standards (IVS) issued by the International Valuation Standards Council (IVSC), as applicable to the purpose and terms of the engagement.

### Regulatory requirement w.r.t valuation exercise:

Regulation 166A of the ICDR Regulations provides for other conditions for pricing relating to preferential issue by listed entity in certain cases. As per Regulation 166A, any preferential issue, which may result in a change in control or allotment of more than 5% of the post issue fully diluted share capital of the issuer, to an allottee or to allottees acting in concert, shall require a valuation report from an independent registered valuer and consider the same for determining the price. Further, the floor price in these cases shall be higher of the floor price determined under Regulation 164(1), 164(2) or 164(4) of ICDR Regulations or the price determined under the valuation report from the independent registered valuer or the price determined in accordance with the provisions of the Articles of Association of the issuer, if applicable.

We understand that Proposed Preferential Issue will result in allotment of more than 5% of post issue fully diluted share capital of Osel. Further, we have informed by the

management that, Proposed Preferential Issue will not result in change in control of the Company.

Accordingly, we are carrying out the valuation exercise to determine the fair value of Equity Shares of Osel in terms of Regulation 166A of the ICDR Regulations. However, we have not determined/calculated control premium since the Proposed Preferential Issue will not result in change in control of the Company.

Based on the review of Articles of Association (AOA) of Osel, we understand that, no methods have been prescribed in the AOA for determining the price of shares of Osel for the purpose of issuance of shares under preferential allotment. Accordingly, requirement for determining the price of shares in accordance with the provisions of AOA is not applicable in the present case.

### **Selection of Valuation Methodology**

There are following three main valuation approaches –

- ✓ Market Approach,
- ✓ Income Approach, and
- ✓ Asset Approach

There are severally commonly used and generally accepted methods within the abovementioned approaches for determining the fair value of Shares of a Company which can be considered in the present valuation exercise, to the extent relevant and applicable, such as:

- Asset Approach: Net Asset Value (NAV) Method
- <u>Income Approach:</u> Capitalization of Earnings Method, Discounted Cash Flow (DCF) Method

• <u>Market Approach:</u> Market Price Method, Comparable Company Multiples (CCM) Method

Kalpen In 110 (a)

Corporate Office: E-5, LGF, Greater Kailash Enclave-1, New Delhi- 110048
Regd. Office: 202, First Floor, Plot No. 445, Sector- 4, Vaishali-201010, Ghaziabad, Uttar Pradesh Mobile No: + 91 9873457184; Landline No: +91 -120-3531617;

It should be noted that the valuation of any company or its assets is inherently subjective and is subject to uncertainties and contingencies, all of which are difficult to predict and are beyond our control. In performing our analysis, we made assumptions with respect to general business and economic conditions, many of which are beyond the control of the Company. In addition, this valuation will fluctuate with changes in prevailing market conditions, the conditions and prospects, financials and otherwise, of the company/business, and other factors which generally influence the valuation of company and its assets.

The application of any particular method of valuation depends on the purpose for which the valuation is done. Although different values may exist for different purposes, it cannot be too strongly emphasized that a valuer can only arrive at one value for one purpose. Our choice of method of valuation has been arrived at using usual and conventional methods adopted for transactions of a similar nature and our reasonable judgment in an independent and bona fide manner based on our previous experience of assignments of a similar nature.

#### A. ASSET APPROACH:

#### i. Net Asset Value (NAV) Method

The assets- based valuation technique is based on the value of the underlying net assets of the business, either on book value basis or realizable value basis or on replacement cost basis. The net asset value ignores the future returns the asset can produce and is calculated using historical accounting data. NAV Method is mainly used in the cases where the business is to be liquidated, i.e., it does not meet the going concern criteria or in cases where the assets base dominates earnings capability.

The present valuation exercise is being carried out on going concern basis. Further, book value of assets of the company may not truly reflect the earning potentials. Therefore, though we have calculated the NAV per Equity Share based on latest

available financials of Osel, we have given zero weight to this approach to arrive the fair value of Equity Shares of the Company.

#### **B. INCOME APPROACH:**

### i. Capitalization of Earnings Method

This method is being used for valuing a going concern business with reasonable profitability track record. It involves determining the maintainable earning level of the business/entity from its normal business operations. This maintainable profit (considered on post tax basis) is then capitalized at a rate which in the opinion of the Valuer combines an adequate expectation of rewards from enterprise and related risk, to arrive the value of the business.

Within Income Approach, we have considered Capitalization of Earnings Method for the purpose of our valuation exercise.

### ii. Discounted Cash Flow (DCF) Method

Under DCF Method, the projected free cash flows of the company/ business are discounted at a discount rate which reflects perceived riskiness of the projected cash flows in order to arrive at their present value. Then, the terminal value of the company/ business is calculated based on the free cash flow of the last year of the forecast period, which is based on the future long- term growth of the revenues. This terminal value is then discounted to get the present terminal value. The present value of free cash flows for the projected period and present value of terminal value is added to arrive at the enterprise value. Thereafter, adjustment for non-operating assets/liabilities, surplus cash and cash equivalents is made to arrive at the fair value of the company/business.

Valuation based on DCF method is based on future projected financials which are subject to many management assumptions and uncertainties. Further, within Income Approach, we are of the view that, Capitalization of Earnings Method (as detailed above) is more relevant for valuation exercise of listed entities. Accordingly, we have

not considered DCF method for present valuation exercise, since Capitalization of Earnings Method is more relevant for valuation exercise of listed entities.

#### C. MARKET APPROACH:

#### i. Market Price Method

The market price of an equity share quoted on a stock exchange is normally considered as the value of equity share of the Company, if such shares are frequently traded subject to speculative support that may be inbuilt in the value of such shares.

The Equity shares of Osel are listed at NSE Emerge (SME segment of NSE). There are regular transactions in its Equity Shares with adequate volume at NSE. Further, Equity Shares of Osel is frequently traded in terms of the provisions of the ICDR Regulations.

Therefore, for the purpose of valuation exercise, we have considered Market Price Method. For the purpose of arriving the value per Equity Share under this method, we have considered the pricing methodology prescribed under Regulation 164(1) of the ICDR Regulations.

### ii. Comparable Company Multiples (CCM) Method

Under CCM Method, value of shares of a company/business undertaking is arrived at using multiple derived from valuation of comparable companies as manifest through stock exchange valuation of listed companies. This valuation is based on the principle that market valuations, taking place between informed buyers and informed sellers, incorporate all factors relevant to the valuation. Relevant multiples need to be chosen carefully and adjusted for difference between the circumstances.

In terms of data available in the Prospectus dated September 20, 2024 of Osel and data provided by the management, following are the break -up of operating revenue of Osel:

**Notes:** Data for FY 2021-22, FY 2022-23 and FY 2023-24 has been taken from Prospectus of Osel. Data for FY 2024-25 was provided by the management.

Based on the above break up of operating revenue between two business segments of Osel, we understand that, Hearing Aid business contributes more than 50% percent of total operating revenue for FY 2022-23, FY 2023-24 and FY 2024-25. Even for FY 2021-22, Hearing Aid business contributed ~41% of total operating revenue of Osel.

We have not found any listed peers in India which can be directly compared with Hearing Aid business of Osel. Further, in terms of disclosure under Prospectus of Osel (Chapter: Basis for Issue Price), there are no listed companies in India that are comparable in all aspects of business and products that it offers.

Since, one of the major business segments of Osel is not comparable and therefore, in our opinion this method is not suitable in the present case and accordingly we have not considered this method for our valuation exercise.

### VII. Basis for arriving at Fair Value:

**♣** Net Asset Value Method:

Corporate Office: E-5, LGF, Greater Kailash Enclave-1, New Delhi- 110048

Regd. Office: 202, First Floor, Plot No. 445, Sector- 4, Vaishali-201010, Ghaziabad, Uttar Pradesh

As per audited financial results of Osel for the year ended March 31, 2025, net assets of Osel attributable to the Equity Shareholders of the Company comprises of INR 1,079.49 Million. The number of outstanding Equity Shares as on that date are 16,129,200 having face value of INR 10 each. Accordingly, value per Equity Share as per NAV Method is INR 66.93.

Detailed calculation of valuation using NAV Method is enclosed as Annexure A.

#### Market Price Method:

Under Market Price Method, we have considered pricing methodology prescribed under Regulation 164(1) of the ICDR Regulations.

In terms of Regulation 164(1) of the ICDR Regulations, the price of the equity shares to be allotted pursuant to the preferential issue shall be **not less than higher of the following**:

- the 90 trading days volume weighted average price ("VWAP") of the related equity shares quoted on the recognised stock exchange preceding the relevant date; or
- the 10 trading days VWAP of the related equity shares quoted on the recognised stock exchange preceding the relevant date.

Thereafter, we have considered the higher of the above two values as value per Equity Share of Osel under this Method. Further, in terms of explanation of Regulation 164 of the ICDR Regulations, 'stock exchange' means any of the recognised stock exchange(s) in which the equity shares of the issuer are listed and in which the highest trading volume in respect of the equity shares of the issuer has been recorded during the preceding 90 trading days prior to the relevant date. Since, Equity Shares of Osel are listed at one Stock Exchange i.e NSE Emerge, therefore, for the purpose of our

valuation exercise, we have considered trading data of NSE/NSE Emerge for determining the value of Equity Shares of Osel under Market Price Method.

# A summary calculation for arriving the value under this method is as follows:

S. No.	Particulars	based on 90 Trading Days preceding	
1.	Total Trading Turnover of Equity		
	Shares of Osel (Value in INR Million) [A]	7	,
2.	Total Trading volume of Equity Shares of Osel (in Nos.) [B]	3,266,800	525,600
3.	VWAP per Equity Share of Osel (C=A/B*10^6) (in INR)	278.09	339.54

Detailed calculation of valuation using Market Price Method is enclosed as Annexure B.

### **♣** Capitalization of Earnings Method

Under this method, we have considered profit of tax (PAT) for last three financials years with appropriate weight to arrive at maintainable PAT. Thereafter, we have divided such maintainable PAT with appropriate capitalization rate to arrive the Equity Value of the Company. To arrive the value per Equity Share, we have divided the Equity Value with outstanding Equity Shares of the Company as on Valuation Date.

Note: Rationale for Assigning weight to Valuation Methodologies:

In the present valuation exercise of Osel, we have assigned appropriate weight to valuation methodologies considered in our valuation exercise, to arrive the fair value of Equity Shares of Osel. A brief rationale for assigning the appropriate weight to valuation methodologies considered in the valuation exercise is as follows:

- **A. NAV Method:** NAV Method is mainly used in the cases where the business is to be liquidated, i.e., it does not meet the going concern criteria or in cases where the assets base dominates earnings capability. Valuation of Equity Shares of Osel has been done based on going concern basis. Further, book value of assets of Osel may not truly reflect the earning potentials of Osel. Therefore, we have assigned **zero weight** to NAV Method for arriving the fair value of Equity Shares of Osel.
- **B.** Market Price Method: For valuation of a listed entity where there are regular transactions in its Equity Shares with adequate volume, market price of the Equity Shares has been considered as important benchmark for arriving the fair value of Equity Shares. We have provided <a href="https://doi.org/10.1001/jher.net/">https://doi.org/10.1001/jher.net/</a> higher weights, relatively to other methods (66.667% or two third) to Market Price Method, since we

are of the view that, market price is based on transaction between unrelated buyer and seller in an orderly manner (i.e based on transactions at exchanges).

C. Capitalization of Earnings Method: Within Income Approach, we have considered this method for our valuation exercise. We have given weight of (33.333% or one third), relatively lesser weight compared to Market Price Method, since in our opinion, Market Price Method should be given higher weightage for the reason detailed in point B as above.

#### **VIII. Valuation Conclusion:**

We have formed an opinion on the fair value of Equity Shares of Osel, based on the information provided by the management & available in the public domain and rationale mentioned in the preceding paragraphs. We are of the opinion that, as on Valuation Date, fair value of one Equity Share (having face value of INR 10 each) of Osel in terms of Regulation 166A of the ICDR Regulations is INR 289.00 (Indian Rupees Two Hundred and Eighty-Nine only).

IX. Caveats, Limitations and Disclaimers on the valuation of Equity Shares of Osel:
